(a) Excess of births over deaths. (b) Excess of arrivals over departures. (c) Includes natural increase and net overseas migration. (d) Includes adjustments of population between July, 1933 and June, 1954, on the basis of Census results. (e) Census 30th June.

POPULATION: STATES.

NOTE.—For dates subsequent to the Census of 30th June, 1954, the estimated population in each State represents the population ascertained at the Census, plus natural increase and recorded net migration into the State since the Census. As complete records of interstate migration are not available, the estimated State populations so derived are approximate, and are subject to revision when the actual population of each State is ascertained at the next Census. For some States such revisions were substantial after the Census of 1954.

VALUE OF RETAIL SALES IN AUSTRALIA(a): COMMODITY GROUPS.

(Figures from 1952-53 inclusive adjusted on a basis comparable with the 1956-57 Retail Census.)

The figures in the table below relate to retail sales of goods (as distinct from services, repairs, accommodation, entertainments, meals, etc.) by establishments which normally sell goods by retail to the general public from shops, rooms, kiosks and yards. Hotels, garages and service stations are also included in respect of goods sold, but establishments such as clubs and guest houses are entirely excluded. Figures for the years 1952-53 and 1956-57 are derived from censuses taken in respect of those years, whereas other figures are estimates made by means of sample surveys.

WHOLESALE TRADE.

An indication of fluctuations in the value of wholesale trade is given by the returns made under the Sales Tax Acts. With certain specified exemptions, all goods sold by wholesale in Australia, including imports, are taxable. The returns do not relate to all wholesale trade, as vendors trading only in exempt goods are not required to furnish returns. They do not necessarily cover a constant proportion of all trade. The effects of legislation and administrative changes on the recorded values of taxable and exempt goods respectively are somewhat uncertain, but total recorded sales are affected in smaller degrees. Insufficient information is available to enable adjustment to be made to the crude figures on this account.

SHARE PRICE INDEXES.

In comparing movements in the two sets of index numbers on this page, attention should be paid to differences in the methods by which they have been constructed, and in the nature of the companies and the types of shares included in each index. These are outlined in the footnotes to the table.

(a) Converted from original base, par values. The index numbers relate to the prices of ordinary shares on the Sydney Stock Exchange of principal companies (excluding banks) whose business in New South Wales is extensive. The prices of individual shares are unweighted and each group average is the mean of the average monthly prices per £1 of paid-up capital. Adjustments are made for changes in the capital structure of the companies. (b) Converted from original base, April, 1928. The index numbers are based on the prices of the ordinary shares of sixteen representative Queensland companies, and the preference shares of two companies whose ordinary shares are inactive. The index numbers represent unweighted averages. Mean monthly values are used. (c) Index temporarily suspended pending revision. (d) These shares relate to leading companies and do not include bank shares or mining shares.

EXPORT PRICE INDEXES.

These index numbers are compiled from the prices of 20 commodities which normally constitute about 80 per cent. of all exports. In general the index numbers show price changes in the predominant market or markets for each commodity, but average prices realized for exports are used for some markets.

SIMPLE AGGREGATIVE INDEX: FIXED WEIGHTS.

In this index the weights are the average annual exports of each commodity (production in the case of gold) during the three years 1933-34 to 1935-36.

(Base of each Index: Average of 3 years ended June, 1939 = 100.)

EXPORT PRICE INDEXES—continued.

RECENT TRENDS—EXPORT PRICE INDEX—WOOL AND "OTHER GROUPS".

Group indexes in the table on page 22 show the great fluctuations and the wide dispersion of prices of export commodities in recent years. In particular, very great movements upwards and downwards have occurred in the price of wool. Since wool is a predominant export, and comprises 46 per cent. of the base aggregate of the index, fluctuations in wool prices obscure the effect on the All Groups Index of movements in prices of the other components. "Wool" and "Other Groups" are shown separately below.

NOTE.—The index numbers in the two preceding tables indicate satisfactorily the general trend of export prices, but do not take account of the relative quantities actually sold at the prices ruling in particular months. The "changing weights" index numbers, shown below, take account of this factor. In computing these, the weights used are the quantities actually exported (sold in some cases) in the months (or periods) to which the index numbers relate. The index numbers for the most recent available month are:—

WHOLESALE PRICE (BASIC MATERIALS AND FOODSTUFFS) INDEX.

Commodities in this index are priced in their primary or basic form wherever possible. The prices used have, in the main, been obtained directly from manufacturers and merchants. With a few important exceptions they are from Melbourne sources. The weighting system adopted is based on estimates of the average annual consumption of the commodities in Australia during the years 1928-29 to 1934-35 inclusive.

(a) Special purpose index for the "Metals and Coal" group excluding Coal and Briquettes was 436 for June, 1960, and 425 for the year 1959-60. (b) Represents only such imported commodities as are included in the Wholesale Price Index and does not measure changes in prices of all imports. (c) NOTE.—During 1956 these indexes were reconstructed from the base period by excluding potatoes and onions. For June, 1960, index numbers for these groups comparable with the previous indexes including potatoes and onions were: "Foodstuffs and Tobacco," 383; "Goods Principally Home Produced," 403; "Total All Groups," 367. For the year 1959-60 they were: "Foodstuffs and Tobacco," 345; "Goods Principally Home Produced," 373; "Total All Groups," 346.

PRICE INDEX NUMBERS: VARIOUS COUNTRIES.

Source: *Monthly Bulletin of Statistics* of the Statistical Office of the United Nations.

The index numbers show fluctuations in prices in each country and do not measure relative price levels as between countries.

A short dash on each side of an index number (e.g. -95-) indicates that two series have been linked at that period.

CONSUMER PRICE INDEX.

The Consumer Price Index was first published on 12th August, 1960, in statistical bulletin S.B. 837 which contains a brief description of the index. For current statistical purposes it replaces both the "C" Series Retail Price Index and the Interim Retail Price Index.

Except in Tasmania, there has been no change in weighted average standard weekly hours since September, 1953.

AVERAGE WEEKLY TOTAL WAGES PAID AND AVERAGE EARNINGS.(a)

The following figures are derived from employment and wages recorded on Pay-roll Tax returns (which cover approximately 75 per cent. of the estimated number of civilian wage and salary earners in employment), from other direct collections and from estimates of the unrecorded balance. Pay of members of the Defence Forces is not included. The figures are not seasonally adjusted. A seasonally adjusted quarterly index of average weekly wage earnings is published on page 2.

(a) Includes salaries. (b) Includes the Australian Capital Territory. (c) Includes the Northern Territory.
(d) Total wages as above divided by total civilian employment expressed in male units. Male units represent total male employment plus a proportion of female employment based on the approximate ratio of female to male earnings. The same ratio has been used in each State and, because the average ratio of female to male earnings may vary between States, precise comparisons between average earnings in different States cannot be made on the basis of the figures above.

NOTE.—Comparisons as to trend should be made for complete years or corresponding periods of incomplete years. Quarterly totals and averages are affected by seasonal influences.

(a) Registration in Victoria is according to purpose of use and not type of vehicle; consequently motor car registrations are overstated by the inclusion of commercial vehicles, registered for private use. Prior to 12th November, 1951, primary producers' private cars registered in Victoria were included in commercial vehicle registrations. (b) Excludes the Northern Territory.

(c) Includes some new registrations effected in preceding months but not passed into central registration records until subsequent months.

NOTE.—Particulars of New Motor Vehicles registered, as shown above, are compiled by the Registration Authorities in each State, and, because of the factors referred to in note (a) and for other reasons, differ from those published in the Monthly Bulletin of Registrations of New Motor Vehicles and the Monthly Press Statement.

(a) Represents the combined transactions of the Consolidated Revenue Fund and the Business Undertakings—Railways, Tramways and Omnibuses and Sydney Harbour Trust Section of the Maritime Services Board—included in the annual Budget Papers. Adjustments have been made to exclude duplications. (b) To avoid duplication in aggregating particulars for the Commonwealth and States, the grand totals have been adjusted to exclude State payments to the Commonwealth in respect of pay-roll tax and Commonwealth payments to the States included in State Consolidated Revenue Funds in respect of the interest on State debts, special grants, uniform taxation, special financial assistance, grants to universities, tuberculosis capital expenditure and National Welfare Fund payments. There are other relatively minor payments for which adjustments have not been made and the adjusted figures are therefore still slightly overstated.
